	<u>FY 2008 Difference</u>	<u>FY 2009 Difference</u>	<u>FY 2010 Difference</u>	<u>FY 2011 Difference</u>
Expenditures:				
General Fund	\$0	\$0	\$0	\$0
Revenue:				
General Fund	\$0	\$0	\$0	\$0
Net Impact-General Fund Balance	<u>\$0</u>	<u>\$0</u>	<u>\$0</u>	<u>\$0</u>

FISCAL ANALYSIS

Assumptions:

Department of Environmental Quality (DEQ)

1. New public sewer systems and modifications to existing systems are currently required to go through plan and specification review if they utilize many of the available funding grants and loans.
2. Systems that could utilize the existing exemption are still required to comply with the established standards whether they are reviewed or not.
3. All systems have historically been undergoing the review and approval process even with the exemption in place.
4. The term "source water" in place of "wellhead protection" is reflective of a broader application of the program that is now required to include both surface water and ground water.

5. The authority to adopt rules related to financial, technical, and managerial capacity is required from the Environmental Protection Agency. The proposed changes make the DEQ capacity authority clear.
6. There will be no fiscal impact to the DEQ as a result of this bill.
